

## **DISCOVERY SESSIONS - FURTHER EDUCATION/16+**

We offer enriching, curriculum-linked sessions designed to enhance and consolidate student's learning. These hands-on sessions are brought to life with activities relating to the natural world using bio-facts (skulls, skins and stuffed specimens), and up to three live animals. Functional skills are embedded throughout our sessions.

**Detailed below are the exciting range of education lessons that we offer Further Education students. All lessons last 45 minutes.**

### **Careers @ WMSP**

There are many different animal-related careers at WMSP. This session explores the variety of roles available within the industry and considers the skills and qualifications essential for success.

### **Wildlife Conservation**

WMSP is home to a variety of animals listed as 'Endangered' on the IUCN Red List of Threatened Species. This session considers the threats these animals face in the wild and the work WMSP carries out both at home and abroad to help them. Become inspired to be a proactive force in preserving our planet and animals for future generations.

### **Animal Management**

This session looks at the importance of zoos and safari parks and explores how they provide people with connections to nature to educate them about conservation issues. Discover how we inspire guests and encourage them to change behaviour in ways that positively affects the conservation of wildlife. This session includes looking at managing breeding programs, research into conservation activities, veterinary care and habitat management.

## **Behaviour and Training**

Animal training is essential to ensure high levels of care for animals within zoological collections. This session explores animal behaviours and training techniques that our keepers use on a day-to-day basis to aid with husbandry, veterinary care and to provide enrichment.

## **Darwin's Discoveries**

Evolution has shaped the living world around us. From the dawn of time when life began as a single-celled organism, life has been one big competition. Evolution has been a constant driving force in pushing us to our limits - only the strongest will survive!

The Theory of Evolution by Charles Darwin sets out a manifesto that has defined our very existence. This session will explore the hows and whys of life on Earth today.
