

DISCOVERY WORKSHOPS - HIGHER EDUCATION

We offer practical, curriculum-linked, in-depth workshops that encourage students to work scientifically as they explore the world around them. These hands-on sessions are brought to life with activities inside and outside the classroom relating to the natural world. Functional skills are embedded throughout all our workshops.

Detailed below are the exciting range of workshop sessions that we offer Key Stage 2 students. All workshops last 1 hour 30 minutes.

Enclosures and Enrichment

Zoos and safari parks have a duty of care to provide species with a safe and stimulating environment where they can exhibit their natural behaviours. Animal enclosures are designed to represent species' natural habitats and to provide an immersive experience for guests. Join us to discover how this is achieved and have the chance to design an enclosure and enrichment for our animals.

Career Development

This session explores the variety of roles available within the animal industry and considers the skills and qualifications essential for success. Students will learn the importance of CV writing and gain confidence through interview role plays. This session is a great opportunity to prepare students for their future careers.

Business @ WMSP

WMSP is a successful family-run business focussed on providing a safe, entertaining and memorable day out for all of our guests. This workshop explores a variety of aspects of the business, from marketing to customer service and gives students the opportunity to find out what goes on behind the scenes within a big business.

Research and Conservation Skills

A fantastic opportunity for your students to see how research is used to aid conservation. Join us to give them the chance to put their scientific skills into practice by conducting an investigation into some of the animals here at WMSP.

If you would like to book a session please call
